

# Exposure Signal Intelligence Platform

## ESIP Data License

Version: 1.2 · Status: Current · ZenzizenSec Inc. · April 2026

---

ZenzizenSec Inc. — Ontario, Canada

Province of Ontario, Canada

Anyone accessing ESIP free public data surfaces

Public — published alongside the GitHub snapshot and free API

### Plain-Language Summary

This license governs your use of data published by ESIP through its free public surfaces (GitHub daily snapshot and free public API).

- use ESIP free data for most purposes — research, tools, integrations, commercial work — as long as you credit us.
- build a competing signal intelligence product using our free data without our written permission.
- redistribute the dataset as a standalone product without our written permission.
- benchmark or publish accuracy comparisons of ESIP data without our written permission.
- use it if you are on a Canadian government sanctions list.
- Use it at your own risk.

## 1. Definitions

means the Exposure Signal Intelligence Platform, operated by ZenzizenSec Inc.

means ZenzizenSec Inc., a company incorporated in Ontario, Canada.

means any data published by ESIP through its free public surfaces, including the GitHub daily snapshot and the free public API at [public.exposuresignal.io](https://public.exposuresignal.io).

means the individual, organization, or automated system accessing or using the Licensed Data.

means any commercial product or service that provides CVE risk intelligence, vulnerability signal scoring, exploitation likelihood assessment, or materially similar signal intelligence capability — where ESIP Licensed Data is used as a foundational input.

means making the Licensed Data or a derivative of it available to third parties as a standalone dataset, data feed, or data product — whether for free or for payment.

means any data element produced through interpretation, correlation, scoring, or prioritization of raw observations. Raw observation events (exploit publication, KEV inclusion, PoC availability) are not Derived Intelligence.

## 2. Grant of License

Subject to the terms of this license, ZenzizenSec grants You a non-exclusive, worldwide, royalty-free license to:

- the Licensed Data for any lawful purpose, including personal, academic, research, non-profit, open-source, and commercial purposes, except as restricted in Section 3.
- the Licensed Data for internal use.
- from the Licensed Data, including processing, transforming, combining with other data, or embedding in tools and applications, subject to Attribution requirements in Section 4.
- the Licensed Data or derivatives publicly, subject to Attribution requirements in Section 4.

This license does not grant any rights to ESIP's commercial data, Derived Intelligence, scoring methodology, signal weighting logic, or any data element not included in the defined free public surfaces.

## 3. Restrictions

### 3.1 Competing Products

Use of Licensed Data as a foundational input to a Competing Product requires explicit written permission from ZenzizenSec. To request permission: [legal@zenzizensec.com](mailto:legal@zenzizensec.com). ZenzizenSec will respond within 30 business days. Absence of a response does not constitute permission.

This restriction applies regardless of whether the Competing Product is commercial or free.

- Security tools that use ESIP data as one input among many (scanners, SIEMs, dashboards, VM platforms) where ESIP signal intelligence does not materially enable or differentiate the product
- Research tools that analyze or visualize ESIP data without replicating or competing with the ESIP signal intelligence function

### 3.2 Redistribution

Redistribution of the Licensed Data as a standalone dataset, data feed, or data product requires explicit written permission from ZenzizenSec. This applies whether or not You charge for the redistribution.

- Sharing individual data points or small excerpts with Attribution (e.g., citing a CVE classification in a blog post or tool output)
- Including ESIP data as embedded output within a tool or application

### 3.3 Benchmarking and Comparative Analysis

You may not publish performance benchmarks, accuracy comparisons, coverage evaluations, or competitive assessments of ESIP Licensed Data without prior written permission from ZenzizenSec. This does not apply to internal evaluations conducted solely for Your own procurement decisions, provided the results are not published or shared externally.

### 3.4 Prohibited Parties

You may not use Licensed Data if You are an entity listed on a Canadian government sanctions list or restricted party list, an entity subject to Canadian export control restrictions, or acting on behalf of any such entity.

### 3.5–3.7 Other Restrictions

- You may not remove, obscure, replace, or misrepresent the Attribution required under Section 4.
- You may not represent ESIP Licensed Data as your own original data or claim authorship.
- Automated scraping of the ESIP website CVE query tool beyond reasonable personal research use is prohibited. Use the GitHub snapshot or free API for programmatic access.

## 4. Attribution Requirements

When You use, display, embed, or publish Licensed Data or derivatives in any context accessible to others, You must include the following Attribution:

**Data provided by ESIP / ZenzizenSec — [www.zenzizensec.com](http://www.zenzizensec.com)**

- In the user interface where ESIP data is displayed, if any
- In documentation, README files, or About sections of tools that use ESIP data
- In reports, publications, or papers that cite ESIP data
- In any marketing materials that reference ESIP data as an input

Both the text credit and the link are required. The link must point to [www.zenzizensec.com](http://www.zenzizensec.com) or a ZenzizenSec-operated page. Attribution must be reasonably visible.

FIRST.org / EPSS team; CISA (KEV); Offensive Security / ExploitDB; Rapid7 / Metasploit contributors.

## 5. No Warranty

THE LICENSED DATA IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED.

ZENZIZENSEC MAKES NO WARRANTIES REGARDING accuracy or completeness, fitness for any particular purpose, availability or continuity of free data surfaces, timeliness or freshness, or absence of errors or omissions.

It is threat landscape context intended to inform — not direct — security decisions. You are solely responsible for determining fitness for your specific use case before relying on it in any operational context.

## 6. Limitation of Liability

TO THE MAXIMUM EXTENT PERMITTED BY ONTARIO LAW, ZENZIZENSEC IS NOT LIABLE FOR ANY DAMAGES ARISING FROM YOUR USE OF THE LICENSED DATA, including direct, indirect, incidental, special, or consequential damages; missed security patches or incorrect vulnerability prioritization; breach costs, regulatory penalties, or business losses; data inaccuracies or coverage gaps; or service unavailability.

YOUR USE OF THE LICENSED DATA IS ENTIRELY AT YOUR OWN RISK.

## 7. Schema and Data Changes

ZenzizenSec reserves the right to modify, add, remove, or restructure any data element in the Licensed Data at any time. ESIP will make best efforts to communicate material schema changes in advance through: [www.zenzizensec.com/esip](http://www.zenzizensec.com/esip), [status.signalintelligence.io](https://status.signalintelligence.io), and GitHub repository release notes.

No minimum notice period is guaranteed. Consumers are responsible for monitoring these channels. You should not build critical production systems on Licensed Data without accepting that the schema and content may change without notice.

## 8. Data Publication Schedule

ZenzizenSec publishes the Licensed Data once every 24 hours on a schedule of its own choosing. The publication time may vary. No real-time guarantee, intra-day freshness commitment, or fixed publication time is made. ZenzizenSec reserves the right to change the publication schedule at any time without notice.

The free-tier data surfaces are provided on a best-effort basis and are not subject to any service level agreement (SLA). ZenzizenSec reserves the right to throttle, suspend, or block access at its sole discretion, including in response to abusive usage or excessive automated access.

## 9. Data Retention and Historical Data

The GitHub daily snapshot reflects current state at the time of each publication cycle. It is overwritten with each publication — it is not a cumulative historical archive. Consumers who require historical data must maintain their own archives by pulling the snapshot on their own schedule at their own infrastructure cost. ZenzizenSec is not responsible for data consumers fail to retrieve.

ZenzizenSec reserves the right to retain or remove any version of the Licensed Data at its sole discretion, and to move any data element from the free tier to the commercial tier or withdraw it from publication entirely.

## 10. Termination

### 10.1 By ZenzizenSec

ZenzizenSec may terminate Your license immediately and without notice if You violate any restriction in Section 3; fail to include Attribution as required by Section 4; use the Licensed Data in a manner that violates applicable law; or are found to be a prohibited party under Section 3.4.

### 10.2 Effect of Termination

Upon termination, You must cease all use of the Licensed Data and destroy any copies in Your possession, except for archival copies retained solely for legal, regulatory, or backup purposes. Termination does not affect the rights of third parties who received Licensed Data from You in compliance with this license before termination.

### 10.3 By You

You may stop using the Licensed Data at any time. No notice to ZenzizenSec is required.

## 11. Severability

If any provision of this license is found to be unenforceable or invalid under applicable law, that provision shall be modified to the minimum extent necessary to make it enforceable, or severed if modification is not possible. The remaining provisions shall continue in full force and effect.

## 12. Governing Law and Disputes

This license is governed by the laws of the Province of Ontario and the federal laws of Canada applicable therein, without regard to conflict of law principles. Any dispute arising under this license will be resolved in the courts of the Province of Ontario, Canada. You consent to the personal jurisdiction of those courts.

## 13. Entire Agreement

This license, together with the ESIP Data Publication Boundary document, constitutes the entire agreement between You and ZenzizenSec regarding use of the Licensed Data. It supersedes any prior agreements or understandings on this subject.

## 14. Contact

— Ontario, Canada
